

Index to Volume Thirty-Three—1976

The index to Volume 33 is composed of three parts: a subject index, an author index and an advertising index.

The subject index is made up mainly of terms constructed by *International Pharmaceutical Abstracts*. The IPA index is an alphabetical, open-ended controlled vocabulary index which makes use of standardized headings. (The primary index terms for each article are listed routinely as "key words" following the article abstract.) The subject index also notes all regular *Journal* columns, and under the respective column headings, the titles of editorials and books reviewed, "Equipment and Supplies" and "News" items, and reports from affiliated chapters in "ASHP Affiliates."

Subject Index

A

Absorption

aspirin; poisoning, antidotes, activated charcoal, combination, carboxymethylcellulose gel, in patients, 717
barbiturates; review, in humans, 333
cephalosporin; derivatives, review, 895

Additives

injections; cefazolin, frozen, stability, 639; contamination, particles, effects of inline filters, in dextrose and sodium chloride solutions, 543; dopamine, incompatibilities, antibiotics, in dextrose injection, 537; incompatibilities, potassium penicillin G and sodium ascorbate, lack, in glucose solutions, 448; incompatibilities, visual and UV spectrometry, 1010; intravenous, stability, following reconstitution, 767; programs, in 85-bed hospital, 340; programs, in short term hospitals, 225

Administration

computers; effects, in hospital pharmacy, 459
hospital pharmacy; effects, operations analysis, 452
management; delegation, guidelines, 1190
pharmacists, hospital; motivation, role of management, 379
policies and procedures; formularies, comparison in 44 hospitals, 912

Adsorption; aspirin; on activated charcoal, effects of jam, starch and milk, in vitro, 965

Adverse drug reactions, see **Drugs**, adverse reactions

Advertising

antibiotics; journals, medical, misleading information to physicians by industry, 918
industry, pharmaceutical; availability, information, interpretation and evaluation, comparison of pharmacists, physicians and scientists, 1164

Alcohols, isopropyl; chromatography, gas; 70%, stability, 395

Allergies

insulin; therapy, in patients, 491
penicillin G; anaphylaxis, in patient, 268
penicillin V; anaphylaxis, in patient, 268

Aluminum; packaging; unit dose, oral solutions, nurses' attitudes, 58
